Mr. William Bown
Utah Building Stone Supply
842 West 400 North
West Bountiful, Utah 84087

Dear Mr. Bown:

On June 23, 1999, we received your Plan of Operations to conduct mining activities at your Lynn Springs quarry located in Section 20, T. 14 N., R. 16 W. We have assigned your Plan of Operations as Case File U-77028. Please refer to this serial number in all future correspondence relating to the subject Plan.

We cannot consider your Plan of Operations to be complete until you provide this office with the following information:

1. In your submitted Plan, you indicate that Utah Building Stone Supply (UBSS) has previously disturbed one acre of Public Land in Section 20. You also state that UBSS intends to disturb an additional 0.5 acres under the current proposal. UBSS must flag the perimeter of the proposed 0.5 acres of new surface disturbance, and notify this office when the flagging has been completed, so that our resource personnel can locate these areas in the field.
2. We have received copies of correspondence from the Burley Ranger District, U.S. Forest Service, that indicate that UBSS has removed the fence that once marked the boundary between Bureau of Land Management (BLM) and the Forest Service (FS) lands along the common section line located between Section 20 and Section 29, T. 14 N., R. 16 W. The fence was installed to prevent the loss of livestock across the boundary and to demarcate livestock allotments. What is UBSS's plan for replacing or relocating the fence to re-establish this boundary?
3. On your submitted map, you indicate that your topsoil stockpile is located approximately 50 feet south of the common section line between Section 20 and 29, T. 14 N., R. 16 W, on lands managed by the Burley Ranger District, U.S. Forest Service. Recent inspections of the

existing disturbance in Section 20 reveal that you also have a topsoil and brush/tree stockpile located 50 to 100 feet north of the section line on BLM lands, in an area not shown on any of your submitted maps. Please provide an amended map showing the location of this stockpile and describe any proposals to continue using this location for additional topsoil storage or for the storage of waste vegetation.

Please provide the requested information within 15 days of receipt of this letter or we will consider your Plan to be withdrawn. If you have any questions, or require additional information, please feel free to contact Michael Ford of my staff at (801) 977-4360.

Sincerely,

GLENN A. CARPENTER
